May 2015

Cedar waxwings at the KU Field Station

There are 257 bird species that have been recorded on KU Field Station lands north of the Kansas River in Douglas, Jefferson and Leavenworth counties from 1948 to the present.

Confirmed breeders—*

Probable breeding birds—(*)

R (Rare)—Few records due either to very little suitable habitat or very low population densities.

O (Occasional)—Irregular either during the seasons indicated or in annual frequency.

U (Uncommon)—Present during the seasons indicated or in low densities; regularly occurring but only in the appropriate habitat.

C (Common)—Present in moderate to high densities during the seasons indicated and to be expected on almost any visit to the Field Station.

Accidental—Extremely rare, not to be expected.

Spring (Sp) March–May

Summer (Su) June–August

Fall (F) September–November

Winter (W) December–February

The KU Field Station is managed by the Kansas Biological Survey, a University of Kansas research unit.

785-864-1500, biosurvey@ku.edu, biosurvey.ku.edu
