

Thank you

Key funding for both the Kaw Valley Overlook and the Rockefeller Prairie Trailhead shelter was provided by Lawrence residents Dick and Sue Himes through KU Endowment.

Westar Energy's Green Team donated lumber sawn from recycled power poles for the deck, bench and handrail cap of the overlook, and also provided volunteers, materials and equipment for several Field Station bridges and for a shade structure at the KU Native Medicinal Plant Research Garden. The Green Team and Kaw Valley Electric donated poles for the lumber on the roof and deck of the trailhead shelter.

Contributions to the KU Field Station help support the public trails, field trips, teaching, and conservation of natural areas. We are grateful to our donors, who provide support through the Friends of the KU Field Station at KU Endowment.
